 Adam Sledd, Exec. Dir., Dominion Energy Innovation Center	 Andrew Berke RUS Administrator US Department of Agriculture	 Alleyn Harned Executive Director, Virginia Clean Cities	

Nov. 9

Technology is rapidly advancing and energy tech businesses are moving to Virginia. The theme of this one day summit is “Opportunities Abound for Beneficial Electrification.” The conversation will focus around topics such as electric transportation, economic development, and emerging opportunities and challenges with new loads. We hope you can join this informational convening and network with your peers and colleagues.

Analyzes Electric
Vehicle Adoption**

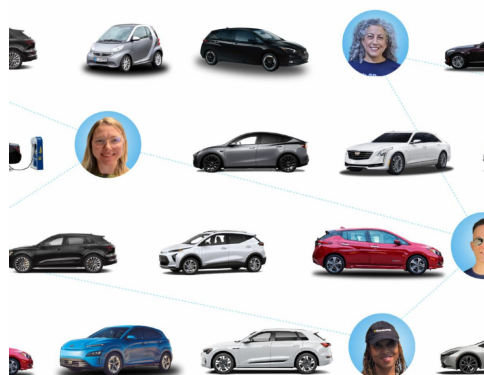

CHARLOTTESVILLE

Acting on Climate Together

First launched in 2013, Charlottesville's Electric Vehicle Charging Grant Program has helped bring public Level 2 and DC Fast Chargers (DCFC) to Charlottesville residents and visitors. EV adoption has increased rapidly within Charlottesville and surrounding communities, and the availability of reliable public charging locations is essential to continued growth in the EV market.

EPA Announces Climate Grant Opportunities

The U.S. EPA released two Notices of Funding Opportunity (NOFOs) announcing competitions for \$4.6 billion in implementation grant funding under the Climate Pollution Reduction Grants (CPRG) program. The \$4.3 billion general competition is open to states, municipalities, tribes, and territories.

Hampton Roads Landfill Turns Trash Into RNG

12 Facts About Propane Autogas

Hampton Roads' Southeastern Public Service Authority (SPSA) has recently opened a renewable natural gas facility at the Suffolk Regional Landfill. The goal is to capture methane from the landfill and using it for electricity generation, pumping it into existing natural gas pipelines.
